

OZONE/UV TRAINING SUPPLIES LIST

(FOR O3UV STANDARD AND HI-DOSE THERAPIES)

STANDARD THERAPY

You will need a patient or someone to administer the therapy to and the following:

EQUIPMENT:

- Ozone Generator
- Champion Full Spectrum UV Machine
- Blue clamps/hemostats (supplied with UV machine)
- Medical Grade Oxygen Tank – sourced from the local area. *(Oxygen concentrators should NOT be used since the oxygen generated still has 5-10% Nitrogen remaining)*

DISPOSABLE SUPPLIES:

- Heparin 1000 units/treatment (Clinic must source this product)

- Standard Turbo 180 cuvette
- 250ml bag of normal saline
- Needles:
 - 18G
 - 21-22G butterfly or Angiocath. *(If using angiocath, recommend a 4-6" extension)*
- Syringes:
 - 1cc diabetic syringe for measuring heparin
 - (2) 60cc
- IV Administration Sets - 15 or 20 drop/ml – ONLY if using cuvette without spike and drip chamber. *(May want to choose blood filter tubing for extra caution.)*
- Venipuncture Supplies – Including a medical Sharps Container

HI-DOSE THERAPY

You will need a patient or someone to administer the therapy to and the following:

EQUIPMENT:

- Ozone Generator – must produce between 64-78 gamma ozone at ¼ L/minute
- Champion Full Spectrum UV Machine
- Hedy Syringe Pump
- Hedy Infusion Pump
- Blue clamps/hemostats (supplied with UV machine)
- 4' silicone tubing with leur locks on each end (supplied with pumps)
- Medical Grade Oxygen Tank – sourced from the local area. *(Oxygen concentrators should NOT be used since the oxygen generated still has 5-10% Nitrogen remaining)*

DISPOSABLE SUPPLIES:

- Heparin 3000 units/ treatment (50,000IU/10ml bottle) (Clinic must source this product)
- Hi-Dose Cuvette & Bag
- 1 – 250ml Bag of Saline
- Needles:
 - 18G
 - 20G Butterfly or Angiocath
- Syringes:
 - 1cc Diabetic Syringe for Measuring Heparin
