

Introducing Cerbo

Cerbo is used by thousands of functional and integrative medicine, direct primary care, or cash-based practitioners.

Our customers come to us when they are setting up a new practice or have been struggling with their current EHR solution.

Created and designed by a busy medical practice, **Cerbo is packed with features that make your life easier, so you can spend more time caring for your patients & yourself!**

cer.bo/try-cerbo

Integrations with labs you already use

Easily share lab results with patients

Simplified billing system

Support for subscriptions, recurring payments, online invoicing, & bill-pay via the Patient Portal

Testimonials

"Honestly, I cannot find a better EHR out there for my membership clinic. Prior to switching to Cerbo, I tried four other software solutions, and **I still think Cerbo is the best EHR** for a direct primary care or membership functional medicine / integrative medicine clinic!"

"You should know up front that **I'm a Cerbo fangirl** and very particular. I started a practice 2 years ago. Thanks to Cerbo, my practice was able to grow rapidly. When I'm asked about my best decisions since starting a practice, Cerbo has always been in the top 3. It still is."

"I've been a long time Cerbo user since 2016 and while they have grown, they are still so much better than the rest at customer service. I've had to interact with many other EHR's before and the customer service is **nothing like Cerbo.**"

"I have never felt like "a number" when I've interacted with many of their techs across my use in 4 different practices over the last 5 years! In fact, I frequently chat with the same techs and love that we can develop "virtual" relationships. **The support Cerbo offers is incredible** and I will continue to exclusively work with them."
